Preface

A story for ABDLs named “Reformatory” was on the Internet in its early years. It had an unsatisfying ending that was not credible even after believing the opening premise. That protagonist was rescued gratuitously without a struggle. In good strong fiction protagonists prevail against the odds by their own efforts.

Nearly three decades ago techno-thriller writer Tom Clancy quoted the fiction writer as following the question of “what if?” with another question of “then what?”.

Being diapered involuntarily is a wide spread fantasy among ABDLs which implies against their will. How could that happen? How could they overcome being made incontinent and then ever be very successful in the potty trained world?

Come along with Abby’s story for a personal journey in diapers. Enjoy!
